Preparation. Provide an area for *McQuaid Inflatables* to place the inflatable. This area must be flat ground clear of branches, fences, and any other obstructions. If being set up on grass or dirt this area must not have any underground electric lines, water lines, sewer lines, gas lines, telephone lines, etc. The bounce site needs to be relatively level. A standard 110-volt outlet within 100 feet is required for operation. A water spigot must be within 100 feet of a waterslide. If you are planning to set up at a city park then you must call that park in advance to let them know you are having an inflatable there and obtain any permits or passes that the park might require to have an inflatable set up.

Customer grants *McQuaid Inflatables* the right to enter the property at the said address for delivery, and required set up, and for subsequent pick up of the inflatable and any associated equipment or packing materials at the approximately specified times.

Special Instructions.

IN CASE OF RAIN:

1. Unplug the blower unit from the electric outlet.
2. Cover the blower unit with the provided tote.

Should the INFLATABLE BEGIN TO DEFLATE, remain calm and help your guests exit safely and quickly.

Evaluate the following:

1. If the motor has stopped, check to see if the blower unit has become unplugged. If so, plug it back into the outlet and the unit will re-inflate.
2. If the circuit breaker has tripped, evaluate and reconnect.
3. If the motor continues to run, check for blockage of the air intake screen on the side of the blower unit. Also, check both air tubes on the back of the inflatable unit for snugness and tighten the ties if necessary.
4. If the blower tube is kinked, straighten it out. Or if the blower tube is disconnected, reconnect to the blower.
5. If any of these steps corrects the problem, fully re-inflate prior to permitting anyone to use the inflatable.
